THE MERCEDES SHOW.

Notwithstanding the inclemency of the weather of Saturday last, and the black clouds of the morning of Sunday, this Show was opened with great eclat. The worthy and esteemed President, Don Nicolas Lowe, arrived on the grounds at 2 o'clock, when a speech was read in the kiosk; the National anthem was then played, fireworks and bombs let off, and the Mercedes Show was once more proclaimed open for the year 1885, amongst a very large gathering of people, including the most noted estancieros from the surrounding country.

The stock exhibited was of a very superior kind and pictures to look at. First and foremost were animals from the celebrated Cabaña of Dr Frias, Santa Catalina, who showed magnificent animals. 'Duke of Oniedа,' a fine young bull of 1 year; 'Orange the 12th,' a beautiful roan animal who is bound to distinguish himself wherever he goes. 'Astrea,' a fine symmetrical heifer, is bound to prove a good mother and likewise distinguish herself. We also find some very good Rambouillet rams and ewes from this same cabaña.

The next animals we notice are some fine Herefords, bred in the country, from the cabaña Esperanza, Lujan, of Señor Don Miguel T. Salas, who has shown great judgment in selecting his stud animals for breeding from, and with the attention his cabaña is now having by his young intelligent manager, this cabaña is bound to be one of front rank, for Hereford cattle are destined to become the cattle of the River Plate, and but for the great loss and inconvenience to any cattle breeders (who unfortunately began with Durhams) it would now to revise their herds, many a man would do it, but time will work this.

These animals comprise five fine bulls and a magnificent heifer all of the Hereford breed.

THE SHEEP.

First and foremost are four pens of magnificent Merino Rambouillets and Negrettis from the celebrated "Tatay estancia, (S. B. Hale, Esq.) who always patronised this Rural Society and is a generous subscriber. Twenty five of these sheep were bought by Don Amadeo Aguirre, Las Flores, and the remainder by Mr Thomas Gahan, Navarro. Tatay will long hold a notoriety for its sheep and fine stock, and the enterprising Manager, Mr Spring, is one of progressing nature. We should like to have seen more animals from this cabaña and think they would have found a ready sale.

Some very pretty Rambouillet rams and ewes were exhibited from cabaña "Medano Blanco" and much admired.

From cabaña "Rivadavia" there were three pens of very nice sheep pure Negrettis and Rambouillet which fetched high prices. Cabaña "Santa Maria", Juan Lopez Cruz, shows a pen of good Rambouillets. Cabaña "La Choza" a pen of Lincolns' and one of Rambouillet. We would advise this gentleman to give more attention to the selections of his rams when his Lincolns' would be much better. Estancia "Grande", Jorge Bell, shows a pen of Lincoln ram lambs with plenty of wool but the frames of the sheep can be much improved by more care. From cabaña "San Fermin", Dr Bernardo Irigoyen there are some very fine Rambouillet ewes and rams, which speaks for the attention this cabaña is getting, and some of these sheep sold for the highest prices of any in the show. For frame and length of wool these sheep are difficult to match. This cabaña also exhibits a beautiful light roan bull aged 20 months, and a fine heifer, Shorthorns.

C. P. Hayward (of Lincoln, England) exhibits three very fine pure bred Lincoln Shearling rams, from the celebrated cabaña Kirkham, whose sheep are so noted for fineness of wool and purity of blood. The President bought one of these rams for his own estancia. These sheep were the source of great attraction. Other sheep were brought in for sale and showed in the open.

A few nice horses, ponies, and pigs brought up the rear of the Show, and on the whole a more complete Rural Fair for a province could not possibly be, and it should prove a means of improving animals, and thus bringing to the front a country that is as yet behind other sheep-breeding countries, such as New Zealand, Australia, and the U. States.

We would suggest to the Society that they have an enumerated catalogue of the stock for next year which would not only be most useful during the show, but as a reference afterwards. We would also suggest that they solicit exhibits for different classes of horses such as draught and good riding and driving horses which would not only be anxiliary to the show but very attractive, as every year horse-breeding is receiving more attention in the country, and while to our knowledge there are several good horses in the district, none of these were exhibited.

During the show Mr. Hayward showed the curative properties of their celebrated Glycerine Dip upon cattle suffering with ringworm and scurf, also for sheep with scab, footrot, etc. He also showed designs of Baths for sheep and a model of his patent Travelling Gangway for putting the sheep into the bath mechanically instead of throwing them in.

A very interesting experiment was given during the days by a new patent 'Biscacha' killing machine, system Candelon, by means of muriatic acid gas which is generated in a very compact case, only weighing 15 lbs., a pigeon, cat, and dog were killed by this gas in less than a minute, which completely proved the destructive qualities of this system. We would suggest to the patentees that they give a public exhibition of this "in a biscachera" when the purpose for which it seems intended would be more fully demonstrated.

Several articles, made in Mercedes, were exhibited in the Kiosk, and caused much attraction, and a stand of carriages, dog-carts etc outside, made by Juan Maria Dubarry, showed excellent workmanship and finish. Altogether the Show was a great success, and being in the hands of so energetic a President, whose motto seems to be "nil desperandum," we may look to the Mercedes "Feria Rural" being the most important provincial Show in the Republic for many years to come, and we would strongly advise every sheep-farmer to patronise it as he will be the gainer.

Another mellifluous rumour to the effect that the loan was done was afloat yesterday. If it is, the bulls on the Bolsa are done for.

SPORTING INTELLIGENCE.

THE LA PLATA SPRING MEETING.

The racing on Sunday at La Plata was as poor a day's sport as we have yet had occasion to chronicle. The attendance, considering the distance and the rainy weather on Sunday and Monday, was even larger than was expected, and must have numbered over 1,000 souls. The fair sex of La Plata were well to the fore and, without doubt, threw some life into a meeting otherwise utterly devoid of interest. The Jockey Club and the Provincial Government did everything they possibly could for the visitors' enjoyment, and no blame can be attached to either for the miserable result of the day's sport.

The Stud Buenos Aires carried everything before it, winning all the events except the last; and even in this its representative, Bonnie Bee, stood at 3 to 1 against the field. Escoces, a son of Blair Adam, won the Premio Puerto as he wished, having no opposition. In the Premio Dolores, Banjo would undoubtedly have won his race had the horses been let go, as they should have been, at first try; but the starter, for some reason of his own, held back, and Banjo ran over 1200 metres before his rider could pull him up. He ran a fair second when they were all let off. Kettledrum won his race in slashing style, beating Luther by a length, Surplice, another son of Phœnix, being a good third. Mercurio was the only surprise of the day, and won a well-contested race from Bonnie Bee by a length. Radcliffe, the English jockey, was in bad luck; but it's rather a difficult operation to get a camel through a needle's eye.

Two things absolutely necessary for the success of a race meeting are lots of entries and a big crowd, and both these requisites were decidedly wanting on Tuesday.

The following is the programme :—

1st Race.

Sport gave $3.06.

2nd Race.

After six false starts they all got away well together, Bolito showing first, with Sweetheart, Loan, Surplice and Kettledrum close on his heels. Close behind came the remainder in a lump, Belvoir being one of the last. Coming round nearly in front of the Stand, Kettledrum ran into first place and held her position to the finish, winning by a length, Surplice half a length behind Luther, Bocaccio 4th and Belvoir 5th. Time, 2.18.

Sport gave $4.35.

4th Race.

PREMIO CAPITAL.

Here Bonnie Bee came again, but was not able to respond to the challenge of Mercurio, who came away from her and passed the post leading by a length. The other two were never in it. Time, 2m. 18 s.

Sport gave $14.35.

A good brass band discoursed excellent music during the day.

CRICKET.

The opening match of the B. Ayres Cricket Club came off at Palermo on Tuesday when the 1st 11 tried conclusions with the rest of the Club, the former being represented by only 7 men, three of their number not putting in an appearance, and one turning up too late to bat, attributable in his case to circumstances over which he had no control, still we think that in response to the Captain he should have, when asked, turned out to field and not have remained a spectator, seeing that one of the opposite side was fielding as substitute for him. The conduct of members who consent to play in a match and then fail to do so without assigning any good reason for their absence, cannot be too severely censured, and being a matter of frequent occurrence the committee of the Club should at once take it in hand and deal with those members in a manner which will present a recurrence of the same in the future.

The seven having won the toss elected to go in, Messrs Gifford and Denison first appearing at the wickets, and 50 runs were put on before a separation took place, Denison being first to go, having compiled 21. Nothing of note took place during the rest of the innings, all being out for 118, Gifford taking out his bat for 58 put together by careful and good cricket, although a couple of chances given towards end of his innings should have been held. The rest of the Club (numbering 20) were all disposed of for the small total of 56, none of the side reaching a double figure, Howson, a promising colt, alone making any stand.

ROYAL AGRICULTURAL SOCIETY OF ENGLAND.

The papers to hand give full particulars of the great success which attended this Show of the above Society at Preston. One of the great features of the Show was the large exhibit of Agricultural machinery, and it seems only to have been necessary to walk over the ground allotted to that class of exhibit to satisfy oneself of the great strides that mecanico-agricultural science has made within a few years. The *Preston Guardian*, in its review of the exhibition, makes special mention of the well-known firm of Messrs R. Hornsby & Sons Ld., of Grantham, whose machinery is so well and favourably known to agriculturalists all over the world, and who are represented here by Messrs M Forrester & Co. Both these firms are fully alive to the requirements of agriculturalists in the Argentine Republic, and are determined to do all in their power to meet the same. Mr B K Morton, the able representative of Messrs R Hornsby & Sons Ld., has only lately returned to England after a lengthened visit to this country, and in order to consult with his firms respecting the special requirements of the River Plate farmers. We understand that Mr. Gerald Woodgate, the popular and energetic manager of Messrs M. Forrester & Co.'s Machinery Department, has also gone to Grantham. In the last letter we received from our Brother-Editor, he says he was just about to leave town for Grantham, to visit the works of Messrs Hornsby, so that our readers will probably soon have from his pen an account of the vast amount of work carried on there. The *Guardian* goes on to say after giving most interesting details regarding the improvements lately made by Messrs Hornsby in their Thrashing Machines, Agricultural Locomotives, etc: "The large stand is simply replete with the most finished specimens of Agricultural Implements for both steam and horsepower, they are specially strong in ploughs, and bring some new implements of this character to the fore, which are durable, light in draught, and can be fitted for subsoiling, hoeing, potatoe raising, or single furrow ploughing. They can also be fitted with new double wing shave and skeith coulter for "ant-hill" cutting. There is here to be seen their Sheaf Binding Harvester, still further improved, which gained the first prize of £100 at last year's trials of the Royal Agricultural Society. In each separate operation which a Sheaf Binding Harvester performs, viz:—cutting, elevating, binding and delivering the grain, the Hornsby Binder has peculiar excellencies, and has well earned the reputation of being the monarch of the harvest field. This machine can be fitted with various useful appendages, among which may be named the sheaf carrier, which drops its 4 sheaves neatly in line with those of the previous round and not one on the top of another as in some systems."

EXPRESS AGENCY.

To the Editor of the STANDARD

Dear Sir,

If you can afford me the space, I should be glad to write a few lines about the Agency.

You, Sir, were one of the first to tell me of the immense difficulties I would meet with in the enterprise, and, indeed, at times, they have seemed almost insurmountable. I have had to fight the ground inch by inch against abuses hardly to be credited in a city like this at the end of the 19th century.

Since the disgraceful riot of the 24th July my chief object has been to obtain the willing services of the boatmen, and I now have the great satisfaction of announcing there is no boatman who does not seek for employment by the Agency.

A certain number of 'changadores' of the mole also work readily for the Agency, but the headman is still against it, and tries to incite others.

Among the many abuses is the question of carts. Few people perhaps know that the river frontage in the Paseo de Julio, from Cuyo to Rivadavia is let by the Municipality; the tenant receiving $4 m/n a month from each cart that plies for hire at the mole or Central Station. This person will not allow the Agency carts to come to either place for baggage, nor will he receive the monthly rental from the Agency, and although I have presented a solicitude to the Municipality about it, I can obtain no redress. However, I am bringing this question urgently forward and hope to have it soon settled.

Another difficulty lately cropped up, is that the Custom House authorities now refuse my agents admittance to the Aduana, the very place where foreign passengers require their assistance. I have presented a solicitude about this, but it has been informed against, on the ground that if the agents are permitted in, passengers may imagine they have an official standing.

In embarking baggage, the Agency invariably makes use of the Catalinas mole. That company have every convenience such as trucks and engines, and cranes, and, what is more, no rabble. The employés also are very civil and obliging, and the tariff is fixed. It would be a great boon for passengers to be landed there also, if they only knew it.

In conclusion, I must add that since the row of the 24th July the authorities of the Prefectura Maritima have invariably given their ready assistance whenever I have asked for it, and I must also acknowledge with gratitude the great encouragement I have received from all the agents of the passenger shipping lines, especially the Royal Mail Steam, Lamport and Holt, and from Mr Christopherson, also from the Press generally, and although the Agency at present may do its disembarking work slowly, passengers must kindly remember the great difficulties it has to contend against. In a very short time I trust all may be working smoothly, and to the entire satisfaction and convenience of the travelling public.

Yours obediently

F. Goddard.

LONDON LETTER.

POSTSCRIPT.

(From our own Correspondent.)

August 2nd.

I am very much afraid that this steamer will arrive before one, at least, of three letters I posted last week. I must, therefore, go a little over old ground. Meantime, I need simply mention, that the *Contemporary Review* of this month contains an article from the pen of Mr. Michael Mulhall, condemning the opinions of Messrs. Goschen and Giffen, in regard to the effect on prices of the relative scarcity and augmented value of gold. Mr. Mulhall considers that notion to have been borrowed from Chevalier and the older economists, now quite out of date. Your brother-editor gives a profusion of figures, to show the fluctuations in prices, over a long period, and also the economies in metallic currency which have been made practicable by the increased use of cheques, &c. He seems to think that prices will go still lower as production and distribution are augmented in power by the advance of mechanical aids. In short, he confirms the latest views on the question. His article is specially one of figures, his plan being to "expose," and neither to "impose" nor "propose," it is, therefore, useless to dwell on the subject, as you will, doubtless, publish the article "in extenso." He is, without knowing it, and, I am very sure, without intending it, a dear, good socialist, like your correspondent and all the cream of the earth at the present moment, including even Lord Salisbury and "old Dolly" — Lord Granville—who, both of them on Friday night, in answer to that melancholy Scot, the Earl of Wemyss, who only knows one tune, and drones away at "There is nae luck about the House (of Peers) since that socialism came up,' confessed that legislation did do, and was obliged to do, a little "mild socialism," as Lord Granville called it. Now, that is no confession of socialism after the ex-screw-ciating Brummagem pattern. The idea, which barely three years ago was crawling in Fleet-street and Chancery-lane, and in the lowest dens of London, has now mounted to the very top. It is, I suspect strongly, in the organ-loft of St. Paul's, and soon it will be shining from the cross on the dome. Henry George did this: not that he is a socialist, not that he told educated people anything they did not know before, but in popular and biblical English he brought the question home to the firesides of this people, who can never understand an abstract proposition.

I must remind you again, that the socialism of the day is purely a scientific and economic question. The lower prices range, the more intolerable will existing conditions become to the capitalist. He will seek new ways, and he has but one exit, in the same direction he has followed in the vulgar joint-stock associations of the last half century. The lowering of prices, by the competition of capitalists armed with the modern and stupendous mechanical means of production, was distinctly foretold by Karl Marx, and the reasons, now confirmed, he gave; and people in now giving the same, like Mr. Crump, of the *Times*, fancy they are making discoveries.

The House of Commons, as far as one can make out from the rough-and-tumble way they do things before breaking up for the holidays, have agreed to raise the "age" to fifteen. that is a sop to the cerberus of Northumberland-street; but it is common sense, in regard to its moderation.

Last night, at Canon-street Hotel, there was a grand conference to protest against the state of the law for the protection of young girls. A Mr. Bunting was in the chair, supported by the editor of the *Pall-Mall*. This gentleman explained the object of the conference, and said he had not communicated with any members of Parliament, whom he described as "men of little faith." He said he had seen Lord Aberdeen, who, with Professor Stuart, Mr. Broadhurst and other gentlemen, wished the conference success, and would have been there had not private affairs and so on. It was proposed at the conference that present legislation should go much further, and that "the age" should be extended to twenty-one. It was finally agreed that there should be a grand demonstration in Hyde-Park in two or three weeks' time. The editor of the *Pall-Mall* stated that he had communicated with "the Booths," who declared they had done their share, and did not intend to take any further part in the matter. That is a bad sign, and looks as if "the Booths" thought singing spiritual songs, such as "Are you coming out to-night," was a more permanent source of revenue than mere physical considerations, which poor people, perhaps, do not appreciate as they ought. The proceedings terminated with vociferous cheers for the editor of the *Pall-Mall*, the waving of handkerchiefs and cries of "God bless him." Oh! Mr. Stead, "the Booths!" that won't do, governor. I am sorry you lost money by the "crusade," as they say you did, and I admire your courageous protest against hypocrisy in high places; but your present friends! No, one must draw a line somewhere.

The attack of the Carlton Club organ, the *Standard*, on Lord Randolph Churchill, is still the all-engrossing topic of conversation in political circles, and has hit the Conservative party severely.

In general politics there is absolutely nothing to record. Lord Salisbury continues to do nothing with great ability, and Russian statesmen, as far as the question with England is concerned, persist in keeping things as they were on the Afghan frontier, until the result of the elections in this country is known. As a sample of the manner in which business is transacted in the dying Parliament, I may mention that Prince Henry of Battenberg took the oath of naturalization in the Lords before he was naturalized, that is, before the Bill had passed in the Lower House; consequently, it had to be rushed through anyhow, amid the bellowing of Radicals, who, whilst they were asking impertinent questions, the Speaker and Mr. Stuart Wortley, who was dodging in and out behind his chair, managed to have it read a second and a third time. The whole scene is most amusingly described in the "Cross Benches" in the *Observer*, for which paper one pays fourpence, for the pleasure of the Sunday reading of "From the Cross Benches."

Mr. Gladstone does not start for Norway till the end of next week, presumably after the prorogation.

ELECTRIC RAILWAY.

To the Editor of the STANDARD.

Dear Sir,

In your impression of the 4th inst., referring to the "Daft Electric Motor" the success of which has recently been telegraphed from New York, you remark "Our American cousins have done it as usual." You can, if you choose, claim the inventor of this system as one more nearly connected with dear old Erin, as he is an Englishman, with a slight tinge of Irish blood, one of his ancestors haaing been a native of that charming isle: besides which he has resided for a couple of years amongst ts intelligent inhabitants, in itself sufficient to conduce to the development of his genius!

Truly yours,

Leo. Daft's Sister.

Belgrano, 7th Sep. 1885.

EDITOR'S TABLE.

Argentine Sugar in the Once Setiembre! Yes, readers, yesterday two large consignments of Tucuman sugar arrived at the Plaza Once, over 2,000 bags, and were sold alongside the wool and hides at $2.20 m/n per arrb. Soon we shall have the Valiente Puntano wine from Mendoza and San Juan selling in the same Plaza. In Buenos Ayres wonders never cease, just imagine all our renowned wool brokers selling sugar and wine at the Once.

The Club del Plata gives a grand concert on Thursday 17th inst, and we return our thanks for an invitation. We note anougst the names of the fair amateurs the Misses Huergo, Borzone, Montenegro, Albaret, Rodriguez, Oro, Lupo and Castaño etc.

Bad news from the United States; the wheat crop will be only 5/7th of the average; this means good news for Santa Fé. Things are most depressed in the U. S., over 11,000 miles of railway in the hands of receivers, and 5 of principal Locomotive work shops closed up.

We learn from a Rosario gentleman that the sales of chacras and farms to new colonists this year surpasses those of any previous year. One gentleman has sold to the value of 400,000 m/n., in small farms in his colony, not, of course, cash, but payable in long terms.

Mr. Blake has kindly presented us with a set of the new fleece made collars and cuffs, the latest invention in Europe, an absorbant in summer and tights and warm in winter. They have just come into fashion in Germany and we purpose wearing them this morning, when visiting the new Bolsa; any invention that calls wool into better demand means millions for this country.

The Rev. Dr. J. Smith will preach on next at 2 p. m. at the house of Mr. Boyd, No. 3 Ituzaingo (Belgrano.)

The latest political news out is the rumoured change in the National Cabinet. Dr Paz, present Minister of Interior, resigns to succeed the late Dr. Laspuir in the Supreme Federal court, and Dr. Ruiz de los Llanos is spoken of as the probable new Minister of Interior.

The news from Spain yesterday evening took away our breath; Monarchy overthrown, Republic established, and "war declared against Germany." Such was the startling rumour current, but as we have received no message from our brother who holds our 70,000 worded code at his elbow, we refuse to believe the report.

Our colleague the *Correo Espanol* published a bulletin yesterday with news from Madrid to 8th September, which says that the efforts of Canovas to avoid a war promise success, and that arbitration will be accepted; but public feeling in Madrid is so excited that the worst is feared. A small fight between Spain and German sailors at the Island of Yap is reported; and the officers in command are doing everything to avoid a repetition of the encounter. In Saragossa they burnt a German soldier's uniform in effigy. In Cataluña the Republican party is proclaimed and Ruiz Zorrilla is supposed to be on the French frontier.

To-day at 1 o'clock all the Spaniards in town are invited to a great meeting to decide on a plan of action; at Montevideo the Spaniards held an indignation meeting and one Gallego put his name down for 20,000 pats to fight the Germans.

The *Anglican Church Gazette* for September was given round yesterday; to-morrow we shall publish some extracts from this interesting monthly.

There was less pepper in the Spanish-German question yesterday. The Iberian Prime Minister has personally apologised to the German Ambassador in Madrid, and arbitration is considered possible; but the Spanish populace do not look much in a humour for it. Our inestimable colleague the *Courrier* of course says that it was Bismarck's agents who 'riz' the ruction that ended in tearing down the Spanish flag. It is on record, we believe, that his Highness has worked the oracle in this way before now.

Who's the Austrian nobleman that the police have caught swindling? This was the great question yesterday in ultra-fashionable circles.

Tuesday was a glorious day, and Palermo, the races, and the Recoleta fetes were equally crowded all day. Where the money comes from for the imitation Rotten Row at Palermo is really a puzzle.

All the papers announced yesterday with a smack of their lips that the Misiones Question was settled. It's not: but it's nearly so. Both countries have agreed to name a Boundary Commission to settle the matter, just as Russia and England named a Commission that never settled anything, and the question would not have been settled at all only for the House of Commons settling Gladstone.

A physician much attached to his profession and his own skill during his attendance on a man of letters, observing that the patient was very punctual in taking all his medicines and following his rules, exclaimed in the pride of his heart, 'Ah, my dear sir, you deserve to be ill!"

Our local *Morning Post* announces that the winter 'recibos en lo de' This That, and T'otherbody are over for the season. What a blessed relief this must be to the received and the receivers—the bores and bored.

The *Prensa*, which has its eagle eye for a long time on the big wooden pavement contract with a Paris firm, says immense efforts were made to whip up a quorum in the Town Council last night and hurry the thing through. Our colleague's vigorous denunciations of this contract must prove fatal to it, and so they ought.

There will be more racing at La Plata on the 4th prox., and a grand trotting match at Palermo between pairs belonging to Messrs. Uriburu and Aguirre is also on the cards. We cordially detest a trotting match.

At the close of the American war with Mexico a prize was offered by an institute in one of the rising settlements in the Far West for an essay on the war. The successful essayist certainly deserves praise for the brevity of his production, which was at follows: "Chapter I.—Cause of the War: Texas. Chapter II.—Result of the war: Taxes.'

The howl about the new Bolsa yesterday was worse than on Monday, but it strikes us that in summer the new building will win in a canter in some respects. A witty friend of ours says the new Bolsa is like a beautiful bust; but there are brains. The arrangements or rather no arrangements, for the opening were quite on a par with the muddle of the ball. The Committee are responsible for the abominable floor. A boarded floor was in the original plan of the architects. New things rarely give satisfaction. Most well bred people have a dislike to anything brand new, be it boot or Bolsa, coat or coat-of-arms. On longer acquaintance, no doubt, the brokers and their new Bolsa will be on better terms.

The extension of the Bateman contract will expire to-morrow, but nothing has been arranged. The sky will fall if something be not done. How will the world get on without Bateman when he is dead?

By all that's admirable! The Garcia-Nazaar lawsuit is to be ripped up again. A lawyer has come to the front with a claim for the whole amount, and says he'll fight his hair grey rather than allow either Garcia or Nazaar to get a rap. Pleasant fellow this to have a lawsuit with.

There was a stiff political row in the Gaiety Theatre the other night, the opposing war cries being 'Viva Rocha!' and 'Viva Celman!' Revolvers were flourished; but the affair did not go beyond shouting and bad language. One man with a child in his arms was the most violent of the lot, and would have indubitably had his head cracked only his opponents were afraid the child might be hurt.

SHEEP ON PASTO FUERTE.

To the Editor of the STANDARD.

Sir

I have read your letter about sheep on 'pasto fuerte,' and agree in everything with the writer. I may tell you that in Queensland, some years ago, people sent out sheep to virgin camps the same as here, and lost heavily thereby. Subsequently they removed what sheep they had left, and stocked the land with cattle, which paid them well; after 4 or 5 years they found that the cattle had eaten down all the coarse grass, and soft grass came up. They then put sheep on the land and found that they did well.

These refined Queensland lands support 2,000 sheep now to the league, and are worth about 50,000 nats gold per league. In Australia, the people are hardworking and with a good Government,

EDITOR'S TABLE

(Continued from 1st page)

An unpaid postman is almost as much to be pitied as an editor with subscribers. It is mentioned by a colleague that the letter-carriers are the very last to be paid their salaries, of all national employees. In our opinion they ought to be the very first,

A most astounding affair took place in Calle Mexico, a square from the beach, on Sunday last, at 4 p.m. As a respectable man was walking towards the river two footpads suddenly put revolvers to his breast and demanded his money or his life. He gave them 140 Nats and they decamped. This is a nice affair in broad daylight!

Terrific screams were heard from a tram car that was going full speed down the incline to Calle Balcarce near the river on Tuesday afternoon. The brakers had snapped. But for the coolness of the driver the car would have tumbled down the barranca into the river. It was dashed against a corner, and some of the passengers were flung out on the stones.

The military authorities are examining the helmet used by our men in the Soudan to adopt it in the Argentine army. It will look frightful. The men are not tall enough. Only tall men can look averagely well in this ugly but most serviceable headpiece. The little red-legged French troops in China looked fearful guys with the helmet on, as it seemed almost as big as themselves, and as if they were carrying their tents open on their heads.

A weak-minded but harmless man was made of use in Sussex to help to dig graves. On the occasion of the burial of a man who had been one of his constant tormentors, he had sense enough to jump in upon the earth when the grave was being filled up, and, as he stamped down the soil, to keep on saying, "Got ye now! got ye now!"

The great sensation at Mercedes Fair is not the rams, the cows, or the flax, but the "Porteur Artigue," a really wonderful new railway system that requires to be seen to be appreciated. It ought to be exhibited in Buenos Ayres, say in the old Bolsa in Bond Street.

There was a mild shine in Congress on Monday. Senators Argento and Puebla are quite in the right. The delays in the despatch of important public business by Congress are outrageous.

The *Republica* of yesterday promised to give its readers this morning an attack on an officer of high rank in the army. Who's who?

Trovatore was excellently given at the National Theatre on Tuesday night. Madame Letrazzini was a splendid Tenora, Signoretti a very fair Manrico; we have heard worse Counts of the Moon and the orchestra was well up to the mark.

The ex-Spanish Consul at Patagones Señor Mases, has just been acquitted of a charge of murder, by the Buenos Ayres courts. The case is briefly this The Consul is married. So was an apothecary who lived next door to him. The man of pills took too great a fancy to the Consul's wife, and in addition, threatened to poison the Consul himself. The latter whose motto is "res non verba," said nothing, but murdered the apothecary on the first opportunity. He has been acquitted, the provocation was certainly terrible.

Dr. Victorica has again postponed his departure for Montevideo, to attend his daughter's wedding at the end of this month.

One thousand seven hundred men are knocked off the army budget this year. Men on paper or real men.

Experience Taught—A lady to a friend: "What a splendid library you have! You must lend me a few books."—The friend, "I regret that I must decline to do so, because books are so seldom returned. Just fancy! all these are borrowed!"

A grand ball and banquet is on the tapis for Dr Irigoyen when he comes back from the provinces.

Oh! Oh! Oh! My corns! The famous Chilian ironclad Esmeralda turns out lame and halt in the hands of her present owners, who say that her bottom was greased on her trial trip, when she did 18 knots, but has never done half that since. We're very sorry for our Chilian friends.

Some audacious rascal stole all the money in Senator Santillan's fab on Tuesday night when he was going into that frisky place of amusement, the Eden Theatre, for "un rato de solaz." The police caught the thief in the theatre and made him disgorge the cash.

The laying of the Anglo-Argentino Tramway in Rosario has been resumed. This news makes us quite happy.

Bravo Colonel! No more political processions at night. The Chief of Police issued a circular on Saturday peremptorily prohibiting any more of them, so this nuisance is well stopped. It is amusing to see the mutual charges and recriminations of the Pot and Kettle as to which was responsible for the stone throwing the other night. The threadbare dodge of declaring that the offenders were political opponents who wanted to throw odium on the "manifestantes" is too old to wash. Very likely they were. But the public don't care a fig, and applaud Colonel Bosch to the echo for stopping the whole farce. A mob row is always more dangerous and disastrous at night.

Another young gentleman, named Bazo, is going to Milan to study music at the public expense. It is really too bad. Considering how hard up the country is at present.

An Iowa judge has decided that a manis in duty bound to tell his wife where he spends his evenings when he is away from home. This decision is all right to a certain extent, but suppose the man doesn't know.

A scientist observes that "a man in full healthy exercise requires about one half pound of meat, nineteen ounces of bread, and three ounces of butter per day." The average man also requires a stiff drink of whisky and a lecture from his wife before going to bed.

One of our morning colleagues printed no fewer than 35 telegrams from Cordoba yesterday, all of the same tenor and date, about electioneering. The public is sick of all this nonsense.

The Fluviales Company have reduced the fare to Asuncion very much, in order to allow purchasers of land under the new Law which we published the other day, to get there and back cheaply. This is very kind indeed.

"I see the villain in your face," said a judge the other day to a prisoner. "May it please your lordship," replied the prisoner, "that is a *personal reflection*."

Important to Mashers—A perfumer down south advertizes on the fourth page of the local gazette a toilet requisite of his own invention—Eau de Noblesse—"which maintains the hair in an honorable direction, and gives the client a grand air of modest distinction."—*Exchange*.

It is said that a little mint will keep rats and mice out of the house. If a fellow owned a mint of ordinary size it would probably "keep the wolf from.

The deepest coal mine in the world is the Rose Bridge Colliery at Wigan Lancashire' which is 808 yards deep, or almost a half mile. There is plenty of coal further down, but the heat in the solid strata is 93½ degrees Fahrenheit.

A Junior asked a young lady the following conundrum: "If small girls are waifs, are large one waifers?"—"Certainly," she replied. "At any rate, the boys are in the habit of applying them to their lips in sealing their vows."

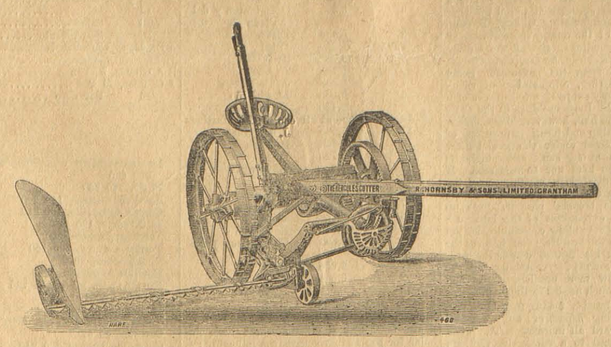
HERCULES MOWER AND FERN CUTTER



his machine has been specially designed for the Colonies and other new countries, for cutting strong thistles, fern and light scrub on rough land, and has been most successful in Autralasia and South America. It has very high wheels and is of great strength combined with lightness in draught.

The cutting apparatus consists of 2 sets of knives, one set fixed to the Bar in place of the Fingers, and the other driven by the Crank plate and connecting Rod in the usual way.

The unanimous verdict of all who have worked this machine is that it is the

"Most useful and economical implement on the estancia."

BORWICK'S BAKING POWDER

Invaluable at the Diggings and in the Bush also on board Ship, as small loaves of the best Bread or Scones can be made in a few minutes without the aid of Yeast.

Private Ward, during the Zulu war, writes:—"I should just like you to see the real farmhouse bread that I bake! The oven is one dug in the ground, and is just large enough to hold our daily quantum of two loaves. We use flour, water, salt, and BORWICK'S BAKING POWDER. My bread often surprises me, it is so light, and white as snow. Some of our men will insist that I have been 'in the trade,' and nothing I can say will convince them to the contrary."

The gold market opened this morning with all the lazy features that generally follow a holiday, and the speculation round the ring ruled dull and uninteresting all day. Brokers cannot get rid of the uneasy sense of novelty about the surroundings, and all the elderly members are much out of humor, owing to the chill that rises from the pavement. Some brokers left the ring, complaining of rheumatism; all gouty subjects are in favor of a return to the old Bolsa building in the Calle San Martin. The hall, however, looked splendid; all the damp and bleak impressions of Monday disappeared under the genial glow and light of a strong sun, and complaints were no longer so loud nor so numerous. If the Camara Syndical lays matting round the ring and the grand hall, opens a few more skylights in the brokers' parlour, puts up railing at both extremities of the latter department in order to allow communication on three sides with the brokers, and induces the marker to chalk his figures double the present size, all grounds for complaint will be removed. A few more benches, chairs and tables are also much needed in the hall.

There was a bearish feeling in gold circles, and the wavering aspect of the premium pointed downward all morning. The weak feeling was traced to a rumor that the loan was done at last; how, nobody knew, but done at all events, although the Argentine commissioner is at sea with all the documents and conditions in his pockets. The report, it is said, came from high quarters and referred, not so much to the fact, as to the certainty of the loan being done. This morning's bearish breeze is the signal for the rehearsal of the old hash about Pellegrini and the loan. The market will again be afflicted with concocted stories and reports for the next fortnight, until the commissioner arrives, when the fun will begin. Although the loan has become a threadbare subject on 'Change, it can be still used as a powerful speculative weapon to sway the market for a day, perhaps for a week, but not much longer. The market is heartily tired of the topic, and the general belief is that the loan means temporary relief and a greater squeeze, a higher premium, and a tighter state of affairs afterwards, unless the Government turn over a new leaf, lay up the fleet, reduce the army, and begin to economize on a heavy scale.

About $70,000 gold changed hands for cash at the ring; the market opened at 42½, rose to 42.70, and closed at the opening rate. Four hundred thousand were sold for the end of the month; rates opened at 42½, fell to 42, and closed at 42.20. Operations for the end of next month embraced $80,000; operations began at 41, fell to 40.20, and closed at 40.50. Sixty thousand were sold for Saturday at 42 to 42.80, rates closing at 42.50. Small amounts were sold for the 15th and 20th at 42.50. The market closed weak for the 30th and for October; the feeling for cash was slightly firm, no doubt in view of the scarcity of gold.

Cedulas ruled very firm and rising. The demand for the investment is increasing and the advance in prices to-day, in spite of the supply of the stock, astonished all. Series A changed hands at 100⅜, E at 81 and F at 81½ to 82. The Bank broker sold over 100,000 Series G for cash at 87⅜ to 87½. Forty thousand G were sold for the 30th at 87⅜. Three hundred shares of the National Bank were sold for the 30th at 146. The stock is much neglected and finds little market. Nothing was reported in the favorite Scrip. All stocks and shares are firm, as money rules very easy and much capital is seeking investment.

The new exchange building has infused fresh life into the great Calle Piedad Bank Square. The many new buildings in course of construction, the starting of half a dozen coffee houses and the presence of the brokers' gigs have changed the aspect of the square completely. The fine new house at the corner of the Calle 25 de Mayo, belonging to Mr. Bernasconi, is rapidly approaching completion. Mr. Bernasconi, we hear, rented this three-story house to Mr. Laborde for $1,200 m/n gold per month rent. The fortunate lessee is subletting the property and gets already $1,200 gold for the ground floor alone, and makes a splendid profit out of the two top stories. Mr. Bernasconi offered Mr. Laborde 20,000 m/n to rescind the contract, but the latter refused. This shews the value of property and the price of rents in the vicinity of the Bolsa. The removal of the Exchange is a great loss to the Calle San Martin; its old busy corner at Cangallo is now deserted and all the life and bustle have fizzled out of the old, historic place.

If the present spell of fine weather continues, shearing will begin in some districts of the Province in a fortnight, and new wool will be seen in the Once and Constitucion markets early next month. As the majority of the flocks are in thin condition, both in the South and West, it is probable that shearing will only become general in the end of December. The flocks in some Southern and far Northern districts are in very poor condition. The season has been the reverse of satisfactory for sheepfarming interests, and the news from Europe is not very agreeable.

The following is a summary of operations effected this morning at the ring during official hours:—

Telegrams from Valparaiso quote banking exchange on London at 23d. and commercial paper at 23½d. Sovereigns are at 98 per cent premium. This is a slight improvement since last advices.

Partial surveys are being already made for the extension line of the Transandine Railway from the town of Mercedes to this city. The concessionaires have not yet decided where to fix the terminus in this city. This looks like business.

European politics are the bane of the Montevidean Bolss, where the slightest alarm is felt with incredible intensity. The melancholy row between Spain and Germany completely upset the bulls on Monday, and the favorite Unifieds weakened considerably after a very brisk speculation. There was a slight improvement in exchange on Monday. Fair amounts were passed at 50⅝ on London. Nothing was done on the continent. Small amounts were passed on Buenos Aires at ¼ discount gold.

The Thales left Rio on Saturday. She is expected in this port to-morrow.

The fine steamer Hevelius arrived at Montevideo last night with dates to the 15th ult. Her mails will be up to-morrow morning.

Freights continue dull, but owing to less steam tonnage in port there is a slightly firmer tendency for the moment. The principal produce going forward consists of maize. The supply of the grain is much greater than had been expected.

Telegrams from London to-day are most unfavorable about wool, prices at the auction opened at a drop of one penny per pound, and since then have fallen 2d. Not for one hundred years has wool been so cheap in the European markets as now.

To-day, for the first time on record two large consignments of Tucuman sugar arrived at the Once, over 2000 bags. It seems impossible, yet it is the fact, Argentine sugar selling in the Once alongside Argentine wool and hides; a good deal of the sugar was sold this morning at 2.20 per arb. Heavy consignments of mani are also arriving at the Once and move off as fast as they come in; and as for maize it is perfectly incredible the quantity of maize offering. No one in either plaza ever supposed there was so much maize in the country.

Mr C Casado, of Rosario, was welcomed on 'Change; he reports the greatest progress at all the Santa Fé colonies, and says that the Central Argentine Railway brought in this year 40 per cent more wheat than in 1884, and that if the new crop comes out all right it will surpass that of 1885.

Mr Cadmus, who has arrived up from Curumalan was welcomed on 'Change; he says the growth of the colonies down there is something wonderful and none of the people at Curumalan lost sheep or cattle this year.

We heard on 'Change that for one colony in this province, the empresario bought today 25 reaping machines and has 25 more coming out. This shows the rapid development of agriculture in the province of Buenos Aires.

Messrs. McNally, Newbery, Kimball and Small and several other American gentlemen have bought 180 leagues of land from the Paraguayan Government. These lands are situated in the Paraguayan Chaco, on the banks of the Pilcomayo, a deep river, with plenty of water for large vessels. The lands are heavily timbered and beautifully situated. We hear of a party, at present in Paraguay, who is applying for no less than 700 leagues of land in the Chaco territory. Lands in the North are coming to the front.

The gold market ruled dull during afterhours and the few brokers who remained in the parlor looked rather glum. The pavement is too much for them; they cannot stand the cold, and the Camara Sindical must immediately take steps to make the place more comfortable. If this is not done quickly a hegira will begin towards the old building. Nothing was reported in gold during afterhours. Everybody was complaining of cold feet and rheumatic pains.

The imminence of war in Spain and the threats of the Spaniards here to start privateers to run down German ships are the talk of the market. All this gammon is laughed at, as nobody believes in the possibility of war between both nations. Even the gold bulls are indifferent in the matter, but shipbrokers are trying to make something out of the hubbub and in the most disinterested manner point to the danger of shipping produce on German or Spanish bottoms.

Messrs. A. Bullrich & Co. sold yesterday at auction the fine Herrera quinta, situated in the Avenida Montes de Oca, Barracas al Norte, for $603,000 %. The land, which occupied a square, was sold in 27 lots, as follows:—

We take the following from the late London papers of the 8th ult.:—

"At the Liverpool Assizes yesterday, before Mr. Justice Manisty, Carl Roskowsky, a sailor, was indicted for the wilful murder of Louis Dale, second mate of the British ship Paragon, on the 17th of April last. The Paragon was bound from B. Ayres to Valparaiso, and had a crew of thirteen hands, most of whom were foreigners. She left B. Ayres on the 27th of March in ballast, and, subsequently, some of the crew were disrated for incompetence. Soon afterwards several of the men began to complain of the shortness and poor quality of the food. Twelve days after sailing the prisoner proposed to another of the seamen, named Dumma, that the crew should kill the Captain and the officers, get something to eat, and take the vessel back to port. On the night of the 17th of April the prisoner went up to Dumma, who was in his bunk. The prisoner had an axe in his hand, and he said to Dumma, "We struck the second mate with an axe; come up and give help". Dumma refused, however, and the prisoner then went to others of the crew and asked them to assist him; but before the crew could assemble for this purpose the Captain appeared with a revolver and ordered the men to get aft. They all went with the exception of the prisoner and a man named Carlsen, who refused to come out of the forecastle. The Captain then advanced and fired his revolver in their direction, and he and the first mate and boatswain went into the forecastle and brought out the prisoner and Carlsen. They were both ordered to be put in irons; but while this was being done Carlsen got loose, and, running to the side of the ship, jumped overboard. The vessel was then off Cape Horn, and the sea was running so high that no effort could be made to save Carlsen, who was drowned. The second mate was found lying on the deck, bleeding from a frightful wound in the head; but he lingered for ten days. On the arrival of the vessel at Valparaiso the prisoner was handed over to the Consul, who sent him home for trial. The jury found the prisoner guilty of manslaughter, and he was sentenced to ten years' penal servitude."

The following commercial telegram has been received:—

"New York, Sept. 8th

"B. Aires, dry cow hides of 20-25 lb, 23 to 23½ centavos per lb.

"B. Aires, becerros of 10-13 lb, 19½-20 cts.

"Stock of dry hides, 300 to 320,000."

Mr. Latzina's trade figures for last month show that imports through the Custom House of this city continue heavy and that exports compare favorably with last month's figures. Imports, last month, show a considerable increase when compared with those of July or with the figures of the same month last year; it is worthy of remark that in July people began to be convinced that consumption was falling-off and that the market was on the eve of considerable shrinkage. This opinion was confirmed to a certain extent, as the imports of July were much under the average and none suspected the spurt that has taken place since. Last month, strange to say, was a far heavier import month than June, February, March or April, being nearly equal to May, but considerably under January. The following comparative figures of the monthly imports for the last eight months and the same period last year will be read with interest:

	1884	1885
January	$4,973,000	$8,143,000
February	3,320,000	4,077,000
March	5,598,000	5,998,000
April	6,018,000	4,235,000
May	7,161,000	7,745,000
June	5,803,000	5,095,000
July	7,183,000	4,417,000
August	6,838,000	7,071,000

The official totals for the above figures of imports are—

1884	1885
$47,637,000	$49,169,000

Eight months..

Thus, this market continues importing on a scale even heavier than that of last year, when the believers in the balance of trade theory asserted that the crisis was the natural result of excessive importation. It looks anomalous, that forced currency, with its many concomitant evils, has not checked consumption in the market, especially if we consider that gold has been at an average premium of 40 o/o and paper money at a discount of 28 o/o. It may be that consumers do not yet feel the pinch of such depreciation, but its effect must be felt sooner or later, and the results will be visible in reduced consumption.

The exports of last month shew a slight increase compared with last July, but not much to speak of. The exports of the eight months, however, show a very satisfactory increase, compared with the same period of the previous year. In spite of the great fall in the value of raw materials in the markets of consumption, the production of this country continues advancing in a very rapid ratio. The following are the figures of exports through the B. Ayres Custom House for the last eight months, compared with the same period of the previous year. The figures will be read with much interest:—

	1884	1885
January	$7,183,000	$5,705,000
February	6,771,000	9,162,000
March	5,071,000	7,702,000
April	5,623,000	7,282,000
May	3,852,000	3,920,000
June	3,449,000	1,906,000
July	3,650,000	2,627,000
August	1,872,000	2,682,000

The official totals for the above eight months are:—

1884	1885
$36,592,000	44,454,000

Eight months..

An average of five years shews that the trade figures of B. Ayres amount to 81 o/o of the total imports and 68 o/o of the total exports of the Republic. Starting on this basis, we may calculate the total trade of the Republic for the eight months, as follows:—

Import 8 months	$60,700,000 m/n
Export do	65,373,000

At the end of this year, the trade of the country will probably shew a heavy excess of exports over imports. The value of the exports of this year will probably reach one hundred million dollars; no wonder the crisis is not felt.

The Custom House returns for the eight months were $15,693,345, against $14,069,433 m/n for the same period of 1884.

The fine Lamport & Holt steamer Leibnitz took the following large cargo:—

788 dry hides
20,221 bags cereals
226 bales skins, &c
6 cases merchandise
87 pipes tallow
27 ½-pipes tallow
1,117 bales beef
200 sheep alive
48 pkgs specie from Rosario, value $28,869, £9,014
6 boxes specie from B. Ayres, value £33,388

One cabin and 7 steerage passengers.

Mr. Gmo. Printzenskold, shipbroker of Rosario, in his important monthly shipping circular, under date Sept. 1st, 1885, gives the following:—

Exports since August 1st, 1885—
41,121 dry ox and cow hides
6,014 salted hides
20 bales wool
200 bales sheepskins
175 bales goatskins
76 bales hair
16 bales sundries
1,313,850 kilos wheat
615,980 kilos linseed
5,379,110 kilos maize
80,000 kilos bran
24 bars silver
2,348 packages silver alloy
441,000 kilos bones
33,200 kilos horns
4,643 bales hay
560 tons limestone
230,300 kilos flour.
